

PRESENTS

## **MINE TECHNOLOGIES AND CAREER OPPORTUNITIES FORUM**

**A presentation, demonstration  
and exhibition of mine technologies,  
education and career opportunities.**

**Call for  
Presentations, Demonstrations and Exhibitors**

**Technologies that drive mining and the mine equipment industries demand ever advancing skills from its employees. But who is looking for skilled workers? How are they attracting the best? What skills are they looking for? Where is the education and training available to obtain these skills?**

The current boom in the mining industry has created a virtual shortage of skilled workers in virtually every technical discipline within mine operations and mine equipment suppliers. More than that, recruiting and retaining skilled employees has become a significant challenge in keeping up with ever-advancing technologies.

Now it's your opportunity to spotlight the latest technologies, opportunities and what it takes to be part of a dynamic mining industry at the **MineSET Mine Technologies and Career Opportunities Forum April 25 & 26, 2008 at the Walden Arena in Lively.**

The core of **MineSET** will feature presentations, demonstrations and an exhibition on needed mining Skills, Education and Technologies in a seminar and trade show format designed to attract and retain skilled employees. A concurrent **Career Fair** will attract employees and students from mining companies, apprenticeship and post-secondary programs allowing you to profile available or future recruitment opportunities.

**We're looking for Sponsor Presentations and Demonstrations that focus on...**

- the technical skills mine operations and suppliers are looking for.
- the necessary values to attract and retain the best skilled employees.
- the areas where the shortage of skilled workers exist.
- the education and training required and available to enter and grow within the mining industry.
- the opportunities that are available for advancement.
- the latest mine equipment technologies.
- remote control operations.
- hands-on equipment demonstrations (outdoor exhibit area).

**We're looking for Exhibitors that include...**

- mine operations who are seeking specific skill sets.
- mining equipment suppliers looking for skilled technical employees for the future.
- related post-secondary education.
- mine industry personnel and staffing.
- human resources.
- employee benefits.

***Present, demonstrate and exhibit at MineSET,  
and set the minds for a career in the mining industry.***
